

Demo Reel Breakdown

- 1) The Crab of Time: (January 2008 – May 2008) Individual Project; I created all the elements in this project.
- 2) Remmington Thatcher III: (May 2008) Group Project; This model was made in conjunction with another person for a presentation to Star Farms Studios for their Edgar & Ellen show.
- 3) The Clockmaker's Revelation: (April 2008 – September 2008) Project under Opal Studios; This was a professional project done for Opal studios. I did a great deal of modeling, rotoscoping animating, motion tracking and cloth simulation.
- 4) The Heart of the Gorgon: (November 2008 - January 2009) Group Project; This snake head was modeled by another person on the project and I did the rigging for it. This rig is a somewhat complex rig that requires the movement of only one null to make it function.
- 5) The Heart of the Gorgon: (November 2008 - January 2009) Group Project; This was a particle system test done in SoftImage ICE for the melting of a chain link.
- 6) The Heart of the Gorgon: (November 2008 - January 2009) Group Project; I did the rigging on the snake heads, the animation was done by another member of the group.
- 7) Space Pirates: (May 2008 – September 2008) Individual Project; I created all the elements of this docking clamp as concept work for the film.
